Preface

The Fourth International Symposium on Fire Safety Science was held at the Ottawa Congress Centre, Ottawa, Ontario Canada, from 13–17 July 1994. There were 315 registrants attending three parallel sessions in which 109 papers were presented. Twenty countries were presented: Australia, Austria, Belgium, Canada, Finland, France, Germany, India, Indonesia, Israel, Italy, Japan, New Zealand, Norway, the Peoples Republic of China, Russia, Saudi Arabia, Spain, Sweden, Switzerland, the United Kingdom and the United States of America.

Opening remarks were given by Mr. J. K. Richardson, Arrangements Committee Chair. Welcoming addresses were given by Mr. J. Ploeg, Vice President-Engineering, National Research Council Canada, Mr. G. Seaden, Director-General, Institute for Research in Construction, National Research Council Canada, Deputy Chief Gary Clark, City of Ottawa Fire Department, and Mr. R. Morris, President, Fiprecan Inc.. Professor J. Quintiere, President, International Association for Fire Safety Science, presented the president’s remarks. Following the opening ceremonies, Professor Ove Pettersson, Lund University, Sweden, delivered the Howard W. Emmons Plenary Lecture entitled “Rational Structural Fire Engineering Design, Based on Simulated Real Fire Exposure.”

Papers were accepted on the basis of their quality and originality in the science of fire safety and its applications. 105 papers from the 172 papers submitted were accepted after peer review. In addition to these and the plenary lecture, six invited papers were also presented during the course of the symposium by Professor Fan Weicheng, Mr. J. R. Mawhinney, Professor H. Holemann, Ms. M. Law and Dr. P. Beever, Mr. R. G. Hill, and Professor R. W. Bilger.

At the Award Reception and Banquet, Professor Ove Pettersson was presented, by Professor Emmons, the H. W. Emmons Invited Lectureship Award. The plaque recording the names of all Award recipients was passed on to the National Research Council Canada to retain until the next symposium.

Professor Emmons presented the Philip Thomas Medal of Excellence for the best paper from the Third Symposium. That paper by A. Atreya and M. Abu-Zaid was entitled “Effect of Environmental Variables on Piloted Ignition.” The award was received by Professor Atreya. Two new awards were presented. The Kawagoe Award is for a lifelong career achievement in and contributions to fire safety. Dr. Y. Hasemi, on behalf of Professor K. Kawagoe, presented this award to Dr. A. Robertson (received by Dr. J. Rockett on behalf of Dr. Robertson). The FORUM Award recognizes an outstanding contribution to the science of fire safety or an advance in the state of the art in fire safety engineering practice of extraordinary international significance. This award was shared among five universities. Dr. J. Snell presented this award to each rep-
resentative of Lund University, the Science University of Tokyo, the University of Edinburgh, the University of Maryland and Worcester Polytechnic Institute.

These proceedings are in the order of the three track sessions at the symposium with invited papers collected together in an opening section. Two accepted papers were withdrawn; one paper was accepted but was not delivered to the symposium. These are not included here. Sixteen posters were displayed in the foyer of the Congress Centre. The titles and authors of posters are listed towards the end of this volume.

The Association would like to record its gratitude to all the committees appointed to organize the various aspects of this successful symposium. It would particularly like to thank Mr. J. K. Richardson, Chair of the Arrangements Committee and his team for their efficient organization of an enjoyable and technically valuable symposium, Mr. D. P. Lund and his assistants for various administrative matters particularly on registration of attendees, and Dr. P. H. Thomas, Dr. M. A. Delichatsios, Dr. J. Hall, Professor T. Hirano, Ms. M. Law, Professor S. E. Magnusson, Professor O. Pettersson, and Professor T. Terai who coordinated the reviews of manuscripts. The Chair of the Publication committee also wishes to thank Dr. J. Rockett, M. K. Kashiwagi and Ms. N. Jason for their support.

The Association acknowledges the support of the following organizations which, by their generous contributions, helped ensure the success of the symposium.

Canadian Wood Council
National Research Council of Canada
BRANDFORSK, Sweden
Canadian Association of Fire Chiefs
Canadian Steel Construction Council
Factory Mutual Research Corporation, U.S.A.
Fire Research Station, U.K.
ITSEMAP FUEGO, Spain
Labour Canada
National Fire Protection Association, U.S.A.
National Institute of Standards and Technology, U.S.A.
SINTEF, Norway
Underwriters Laboratories, U.S.A.
Underwriters’ Laboratories of Canada

Preface iii

International Association for Fire Safety Science v

Symposium Committees vii

Session Chairs viii

Invited Lectures

Rational Structural Fire Engineering Design, Based on Simulated Real Fire Exposure
  Ove Pettersson 3

Fire Research in China
  Fan Weicheng and Li Shufen 27

A Closer Look at the Fire Extinguishing Properties of Water Mist
  J. R. Mawhinney, B. Z. Dlugogorski and A. K. Kim 47

Environmental Problems Caused by Fires and Fire-Fighting Agents
  Hans Hölemann 61

Magic Numbers and Golden Rules
  Margaret Law and Paula Beever 79

A Review of Recent Civil Air Transport Accidents/Incidents and Their Fire Safety Implications
  Richard G. Hill 85

Computational Field Models in Fire Research and Engineering
  R. W. Bilger 95

PHYSICS; CHEMISTRY; SMOKE & TOXIC HAZARD

Modelling of Laminar Diffusion Flames in Vitiated Environments
  Heimo Tuovinen 113

A Study on Pool Flame Structure Using Thermography
  Hiroshi Hayasaka 125
Mass Flux in Fire Plumes
E. E. Zukoski 137

Flame Radiation Distribution from Fires
Michael A. Delichatsios, Patricia Tatem, Yonggang Chen and Vahid Motevalli 149

A Comparison of Two Fire Field Models with Experimental Room Fire Data
L. Kerrison, N. Mawhinney, E. R. Galea, N. Hoffmann and M. K. Patel 161

Study of Early and Reliable Fire Detection in Air-Conditioned Rooms
Kohyu Satoh 173

Mathematical Modeling and Computer Simulation of Fire Phenomena
H. R. Baum, K. B. McGrattan and R. G. Rehm 185

The Ignitability of Flame Retarded Plastics
D. D. Drysdale and H. E. Thomson 195

Thermal Environment Prediction in Steel-Bounded Preflashover Compartment Fires
Michelle J. Peatross and Craig L. Beyler 205

Modelling of Dropwise Evaporative Cooling on a Semi-infinite Solid Subjected to Radiant Heat Input
G. White, S. Tinker and M. Di Marzo 217

On The Influence of Physical Processes on the Transient Pyrolysis of Cellulosic Samples
Colomba Di Blasi 229

Wall Incident Heat Flux Distributions Resulting from an Adjacent Fire
G. Back, C. Beyler, P. DiNenno and P. Tatem 241

Salt Water Modeling of Fire Compartment Gravity Currents
C. M. Fleischmann, P. J. Pagni and R. B. Williamson 253

A Simple Model for Predicting Foam Spread Over Liquids
Bror Persson and Martin Dahlberg 265

Modelling of a Reverse Layer of Fire-Induced Smoke in a Tunnel
A. Guelzim, J. M. Souil, J. P. Vantelon, Doan Kim Son, D. Gabay and D. Dallest 277
Experiments on Smoke Behavior in Cavity Spaces
   Takeyoshi Tanaka and Sunao Kumai  289

The Role of Smoke-Point in Material Flammability Testing
   John De Ris and Xiao-Fang Cheng  301

Examination of Three Pyrolytic Reaction Schemes for Cellulosic Materials
   Indrek S. Wichman and Adedejo B. Oladipo  313

Measurements of the Transient Development of a Ceiling Layer
   Steve Palm and E. E. Zukoski  325

Quantitative Backdraft Experiments
   C. M. Fleischmann, P. J. Pagni and R. B. Williamson  337

Developments on the Fire Propagation Test
   Dr. Akasha M. Azhakesan, Dr. T. J. Shields and
   Mr. G. W. H. Silcock  349

Effects of Gasification Properties of a combustible on flame Spread Over its
Surface
   Takeshi Suzuki and Toshisuke Hirano  361

Prediction of the Steady Rate of Flame Spread Over Combustible Materials
   A. I. Karpov and V. K. Bulgakov  373

Upward Flame Spread Along a Vertical Solid for Transient Local Heat
Release Rate
   Y. Hasemi, M. Yoshida, N. Yasui and W. J. Parker  385

Polyurethane Foam Smoldering Supported by External Heating
   Takuji Suzuki, Bambang Sucahyo, Masaaki Kawamata and
   Toshisuke Hirano  397

Downward Smolder of Polyurethane Foam
   J. L. Torero, A. C. Fernandez-Pello and M. Kitano  409

Effect of External Radiant Heat Flux on Upward Fire Spread: Measurements
on Plywood and Numerical Predictions
   M. M. Delichatsios, P. Wu, M. A. Delichatsios, G. D. Lougheed,
   G. P. Crampton, C. Qian, H. Ishida and K. Saito  421

Upward Flame Spread and Critical Conditions for PE/PVC Cables in a Tray
Configuration
   M. A. Delichatsios and M. M. Delichatsios  433
Pulsating Flame Spread Over Liquids
A. Ito, K. Saito and C. J. Cremers 445

Flame Spread on Charring Materials: Numerical Predictions and Critical Conditions
Michael A. Delichatsios and Yonggang Chen 457

Behavior of a 2-Dimensional Ceiling Jet Flow: A Beamed Ceiling Configuration
Carl C. Koslowski and Vahid Motevalli 469

Validation of Zone Models: Entrainment rates and Convective Heat Losses from Model Atria Tests
O. Ishino, T. Tanaka and M. A. Delichatsios 481

Combustion Characteristics of Several Flammable Gases with Chlorine Trifluoride
Hideo Ohtani, Lee San Gon and Yoichi Uehara 493

Effects of Flame Retardant on the Behavior and Temperature Profiles of Flames Spreading over Paper
Kenji Sato, Katsuhiro Suzuki, Yasuhiro Sakai and Setsuko Sega 503

CO/CO₂ Ratios in Fire
Yoshio Tsuchiya 515

Assessment of Smoke Production from Building Products
Atle William Heskestad and Per Jostein Hovde 527

A Model for Predicting Concentrations of Carbon Monoxide in Building Fires
Shigeru Yamada and Takeyoshi Tanaka 539

Plume Behavior in a Confined Tall and Narrow Space—as One of Sub-Models of Plume for an Atrium Fire—
Satoh Hiroomi, Osami Sugawa, Kitoshi Kurioka and Wataru Takahashi 551

Combustion of Halogenated Polymers
A. Tewarson, F. Chu and F. H. Jiang 563

Flammability of Alcohol-Gasoline Blends in Fuel Tanks
R. Vaivads, M. F. Bardon, V. K. Rao and V. Battista 575
HUMAN BEHAVIOUR & EGRESS; DETECTION; RISK, HAZARD ANALYSIS; SUPPRESSION; APPLICATIONS & SPECIAL FIRES

Performance Measurements of Evacuation Systems
*Gunnar G. Løvås* 589

Egress Complexity of a Building

Simulex; Developing New Computer Modelling Techniques for Evaluation
*Peter A. Thompson and Eric W. Marchant* 613

Evacuation Model for Merging Traffic Flows in Multi-Room and Multi-Storey Buildings
*V. O. Shestopal and S. J. Grubits* 625

International Comparison of Fire Safety Provisions for Means of Escape
*Ichiro Hagiwara and Takeyoshi Tanaka* 633

Evaluation of Fire Safety Measures in Care Facilities for the Elderly by Simulating Evacuation Behavior
*Shuji Kakegawa, Yoshiro Yashiro, Manabu Ebihara and Akira Ohtsuki* 645

Exit 89—An Evacuation Model for High-Rise Buildings—Model Description and Example Applications
*Rita F. Fahy* 657

Use of Egress Modelling in Performance-Based Fire Engineering Design—A Fire Safety Study at the National Gallery of Victoria
*Peter F. Johnson, Vaughan R. Beck and Mahmut Horasan* 669

EvacSim: A Simulation Model of Occupants with Behavioural Attributes in Emergency Evacuation of High-Rise Building Fires
*Leong S. Poon* 681

The Effect of Escape Route Information on Mobility and Way Finding Under Smoke Logged Conditions
*Truls Paulsen* 693

Experimental Study on Effect of Escape Guidance in Fire Smoke by Travelling Flashing of Light Sources
*Tadahisa Jin and Tokiyoshi Yamada* 705
Investigation of a Behavioural Response Model for Fire Emergency Situations in Secondary Schools
Mahmut Horasan and Dorothy Bruck 715

Vector Autoregressive Modelling of Fire Signals
Alexander Fischer and Heinz Luck 727

The Detection of Fires in Micro-Gravity
Martin Shipp and Michael Spearpoint 739

Design of Neural Net to Detect Early Stage of Fire and Evaluation by Using Real Sensors’ Data
Yoshiaki Okayama, Takashi Ito and Toru Sasaki 751

Fire Detection System by Multi-Layered Neural Network with Delay Circuit
Hiromitsu Ishii, Takashi Ono, Yukio Yamauchi and Shigeru Ohtani 761

Early Detection of Room Fires Through Acoustic Emission
William L. Grosshandler and Emil Braun 773

Modified Theory for the Characterization of Ionization Smoke Detectors
Jeffrey S. Newman 785

An Object-Oriented Simulation (Crisp II) for Fire Risk Assessment
J. N. Fraser-Mitchell 793

Experiments to Validate the NRCC Smoke Movement Model for Fire Risk-Cost Assessment
Akihiko Hokugo, David Yung and George V. Hadjisophocleous 805

The Development of a Risk-Cost Assessment Model for the Evaluation of Fire Safety in Buildings
V. R. Beck and D. Yung 817

Parametric Study of the NRCC Fire Risk-Cost Assessment Model for Apartment and Office Buildings
George V. Hadjisophocleous and David Yung 829

Occupant Response Model: A Sub-Model for the NRCC Risk-Cost Assessment Model
Guylene Proulx and George Hadjisophocleous 841
Investigation of Scale Effects on Halon and Halon Alternatives Regarding Flame Extinguishing, Inerting Concentration and Thermal Decomposition Products
   Göran Holmstedt, Petra Andersson and Jan Andersson 853

Experiments on Extinction of Liquid Hydrocarbon Fires by a Foam Technique
   T. P. Sharma, R. S. Chimote, S. B. Gupta and Jagbir Singh 865

The Measurement of Heat Release Rates by Oxygen Consumption Calorimetry in Fires Under Suppression
   Bogdan Z. Dlugogorski, Jack R. Mawhinney and Vo Huu Duc 877

Carbon Dioxide Discharge Test Modelling
   Robert Zalosh and Cheng Wai Hung 889

Suppression of Rack-Storage Fires by Water
   Hong-Zeng Yu, James L. Lee and Hsiang-Cheng Kung 901

Experimental Study of Actual Delivered Density for Rack-Storage Fires
   Tak-Sang Chan, Hsiang-Cheng Kung, Hong-Zeng Yu and William R. Brown 913

Suppression Effectiveness of Extinguishing Agents Under Highly Dynamic Conditions
   G. W. Gmurczyk, W. L. Grosshandler and D. L. Lowe 925

Determination of Safety Factors in Design Based on Performance
   S. E. Magnusson, H. Frantzich, B. Karlsson and S. Särdqvist 937

Experimental Needs for Spacecraft Risk Assessment

International Comparison Analysis on Fire Risk Among the United States, The United Kingdom, and Japan
   At Sekizawa 961

Use of Small-Scale Test Data in Hazard Analysis
   Harold E. Nelson and Eric W. Forssell 971

Iteration of Smoke Movement Simulation Processes for an Optimized Specification of Ventilation Parameters, with a View to Control Fire-Induced Smoke Flows in Atrium Buildings
   Xavier Emile Bodart, Michel Roger Curtat and Philippe Constantin Fromy 983

The Association was established at its first Symposium in 1985. The principal objectives at the Association are the encouragement of research into the science of unwanted fire and the organization of international symposia to present such research. Membership is open to all having these interests. In 1988, it became a registered charity in England and Wales.

The Association is governed by the Committee and its officers. At the 4th International Symposium on Fire Safety Science held in Ottawa, the following Committee and its officers were elected.

Prof. J. G. Quintiere (USA), Chair
Dr. D. D. Drysdale (UK), Vice-chair
Dr. R. Friedman (USA), Vice-chair
Prof. T. Hirano (Japan), Vice-chair
Prof. Y Uehara (Japan), Treasurer
Mr. G. Cox (UK), Secretary
Prof. P. J. Pagni (USA), Executive member
Dr. P. H. Thomas (UK), Executive member

Prof. V. K. Bulgakov (Russia) Mr. H. E. Nelson (USA)
Dr. M. R. Curtat (France) Dr. G. C. Ramsey (Australia)
Prof. Fan Weicheng (P.R. China) Dr. P. G. Seeger (Germany)
Dr. J. R. Hall (USA) Dr. O. Sugawa (Japan)
Dr. Y. Hasemi (Japan) Prof. T. Terai (Japan)
Dr. T. Kashiwagi (USA) Prof. R. B. Williamson (USA)
Dr. M. A. Kokkala (Finland) Dr. W. D. Wooley (UK)
Prof. S. E. Magnusson (Sweden) Dr. D. Young (Canada)

The Association would like to express its appreciation to retiring Committee members for their many contributions:

Prof. R. W. Fitzgerald (USA) Prof. O. Pettersson (Sweden)
Prof. S. Horiuchi (Japan) Mr. J. K. Richardson (Canada)
Prof. K. Kawagoe (Japan) Mr. J. Unoki (Japan)
Dr. M. Kersken-Bradley (Germany) Prof. T. Wakamatsu (Japan)
Mr. K. S. Pedersen (Norway)

The Association owes a debt of gratitude to Prof. K. Kawagoe and Prof. O. Pettersson, who were prime movers in founding and shaping the IAFSS. Their contributions and dedication to fire science have been considerable, and we will miss them from the Committee. We also will miss Mr. J. K. Richardson for his talent displayed in hosting the 4th Symposium.
Over the last three years the Association has taken steps to secure its operations and extend its activities. An IAFSS Administrative Office was established in conjunction with the Society of Fire Protection Engineers in Boston. Through that arrangement, we were able to produce a Register listing members and their addresses, a Prospectus describing the Association, and regular Newsletters edited by Dr. R. Friedman. The Association has negotiated an agreement with the Fire Safety Journal to make it the "Official Journal of the IAFSS." Negotiations are underway to establish reduced subscription rates to IAFSS Membership.

A gift of 10,000 pounds was awarded to the Fire Safety Engineering Unit of the University of Edinburgh. A $500 prize for the best papers at the First Asian Conference on Fire Science and Technology (Hefei, China) was presented. Two new awards were established by the Association: the FORUM Prize for a distinctive contribution to fire science, and the Kawagoe Medal for long term contributions to fire science.

The Association is fostering and cooperating with regional activities in fire science and education in Asia and in Europe, and is seeking to further these aims. Interest in the Association is encouraged by all individuals.
